

You don't have to be big
to be heard...

Go light. Go loud.

...Introducing HS Series
Lightweight High Power
Speaker Arrays.

- ✓ Highly intelligible audio performance
- ✓ Four dispersion pattern options
- ✓ 320 to 6400 watt configurations
- ✓ Mounts to standard 2-inch mast
- ✓ Heads as light as 16 pounds
- ✓ Rugged outdoor construction
- ✓ Reliable and supervised interfaces to the EST3 platform

Self-contained
models provide
portable preparedness
anywhere, any time.

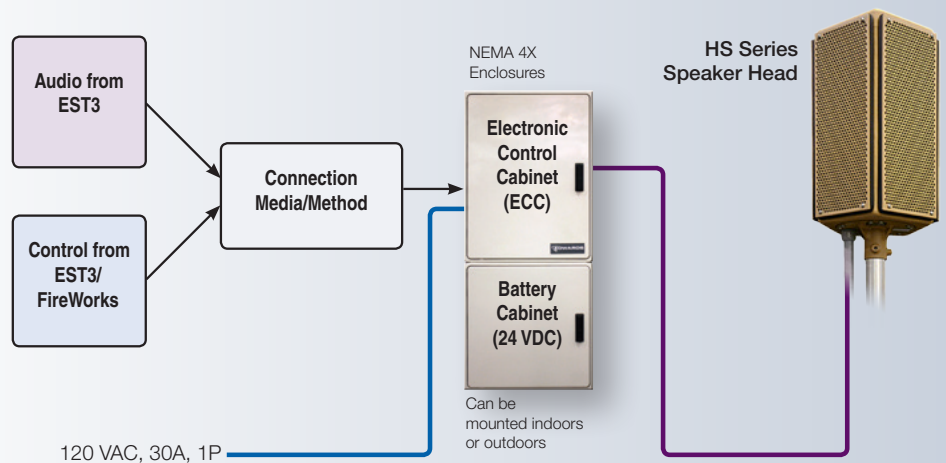

An **EDWARDS** brand.

See what's possible now.

Live Loud.

Lightweight mass notification speakers reduce installation costs and cut maintenance expenses throughout their entire life cycle.

The unique design of HS Series loudspeakers allow for a 100 percent up-time duty cycle — when powered from an AC source, they can be powered and ready to perform 24/7. This makes them ideally suited for daily activation, as well as emergency use.

EST brand HS Series High Power Speaker Arrays (HPSA) employ exclusive HyperSpike® technology to deliver lightweight and acoustically sophisticated solutions for outdoor Mass Notification installations. These rugged outdoor-rated units are among the industry's smallest in physical size, yet they reproduce some of the clearest and loudest audio signals available. At a fraction of the weight and size of competing products, the typical EST solution can be mounted on rooftops without the need for costly structural reinforcement.
