# signals

with style

**Model of discretion:**  
Slim and discreet,  
Genesis horn-strobes  
complement any  
decor (shown  
actual size).

The award-winning Genesis line of products represents the rebirth of fire alarm signals with looks, features, and performance benefits designed with your project in mind. Wall strobes, horns, and chimes about the size of a deck of playing cards offer a discreet alternative to bulky devices, while speakers and ceiling models with clean modern lines blend inconspicuously with their surroundings.

## Signaling on-demand

Though designed for discretion, Genesis signals are also engineered to command attention. Wall-penetrating high dB output and patented FullLight strobe technology immerse the protected area with levels of light and sound that simply can't be ignored – all in exchange for the lowest current demands of any device in their class.

Genesis brings on-demand signaling to every application with an unparalleled range of field-configurable options: horns and chimes with high/low dB output settings; speakers with multiple wattage tap selections; and strobes with selectable

Genesis output levels are changed by simply opening the device and sliding the selectors to the desired settings. Settings remain visible through small windows on the device even after the cover is closed.

Genesis wall and ceiling signals may be ordered with optional "FIRE" markings. Models are available with housings in fire alarm red or architecturally pleasing white.

Optional trim plates for wall horns, chimes, and strobes are ideal for covering openings left behind during retrofits; red or white models are available with or without "FIRE" marking.

Ceiling models are suitable and fully listed for wall mount applications.

candela output and flash rate – options that put you in the driver’s seat when time is short, budgets slim, and manpower at a premium. It also means fewer parts to stock, less inventory to worry about, and the flexibility to meet changing demands – on the fly – without having to reinstall equipment or order more parts!

### Innovative features

With Genesis horn-strobes you also save on wiring costs, thanks to exclusive technology that delivers independent horn control over just a single pair of wires. This important and highly desirable feature makes it possible to silence horns while the strobes remain active.

### Application flexibility

Whether you’re designing for a new landmark structure, or simply retrofitting a local strip mall, competitively-priced Genesis signals bring value, good looks, and installation flexibility to every application. Contact Edwards today to learn how your signal solutions can be the model of discretion.

## A complete line engineered to deliver innovative features and superb output.

### Strobes

- Selectable 15-177 candela output with patented Full-Light technology
- Fixed 15/75 candela models available
- Selectable current-saving temporal flash for private mode signaling
- Precision synchronization with accessory module
- Wall models: strobe, horn-strobe (shown), speaker-strobe, chime-strobe
- Ceiling models: strobe, horn-strobe, speaker-strobe

### Horns

- High/low dB output
- Wall-penetrating alternating frequency
- Coded or non-coded operation
- Independent horn control over a single pair of wires
- Wall models: temporal horn, steady horn, horn-strobe
- Ceiling models: horn-strobe (shown)

### Speakers

- Four selectable wattage taps
- Sealed back construction for durability and improved audibility
- Wall models: speaker, speaker-strobe (shown)
- Ceiling models: speaker, speaker-strobe

### Chimes

- High/low dB output
- Temporal output or 60 strokes per minute
- Coded or non-coded operation
- Wall models: chime, chime-strobe (shown)

The signal master module brings precision synchronization and independent horn control to Genesis applications. Piggyback models (left) and one-gang mount models (right) are available.

The Signature Series® CC1S module offers precision synchronization for applications where controlling strobe flashes across multiple notification appliance circuits is required.

The Genesis “Running Man” icon meets code requirements, overcomes language barriers, and eliminates lens marking headaches. Optional “FIRE” markings are also available.

## Innovation, leadership, and a rich tradition of excellence

Whether EST life safety systems are protecting the lives and livelihoods of the people who make businesses run, or the lives entrusted to the care of public institutions; whether they're charged with protecting the guests of the world's finest hotels, or preserving irreplaceable artifacts that bring history to life; EST stands alone as the brand closely associated with some of the most important and far-reaching developments in the life safety industry today.

Our strength is in our Strategic Partners — the people and organizations we entrust with the technology that has charted the course of life safety protection for decades. Strategic Partners are not middlemen or go-betweens. They are independent contractors that form an integral part of the Edwards marketing and support organization. As insiders, they enjoy exclusive access to products, custom design innovations, specialized training, and pricing privileges. Yet as successful independent contractors, they are adept at ensuring that each submittal is strong and competitive, and that each bid is locally relevant to your installation. As local businesses they not only have to earn your trust — they have to keep it.

Together these strengths set EST installations apart, and have earned this brand a special place among life safety and security solutions available today. Perhaps that's why EST products and systems have become the choice of building owners, architects and engineers around the globe. And why many of the world's most cherished landmarks are protected by Edwards products that bear the EST mark. From the Bibliotheca Alexandrina Museum in Egypt, to the modern-day sphinx at the Luxor Hotel in Las Vegas, professionals who design, own and occupy the world's most impressive structures have come to know that the safest and most survivable solution today is an EST solution.
